

Activity Category: Discovery

Description: Contributions of time and expertise that result in a tangible product that positively influences (or has the potential to positively influence) nurse anesthesia or the greater health care environment.

Value: Each completed tangible product = 10 Class B credits

Required/Recommended Audit Documentation and/or Information:

- Description of the product that has been developed
- Identification how the product positively influences nurse anesthesia or greater health care
- Information demonstrating the individual's role or ownership of the intellectual property/devise/product

I am respectfully submitting review of the creation and content of my existing CRNA Website for AANA Class B Credit.

Description of the product that has been developed

In early 2018, I worked with a Web Designer and Developer to create a website specifically for Traveler CRNA's, Anesthesia Groups, Medical Facilities, and Locum Tenens Staffing Agencies.

The website can be viewed at <https://dreamsafe1099.com>

The goals of the website include but are not limited to:

- Provide help and guidance for Traveler CRNAs and those who want to travel
 - Explain how to obtain a new assignment using a staffing agency
 - Detail the credentialing process step-by-step
 - Answer frequently asked questions about being a Traveler CRNA
 - Provide helpful hints for choosing an assignment, making a contract, what to expect on the job, liability insurance, and more
 - Provide Important links to CRNA Associations, Continuing Education, License Verification, Credentialing Organizations, Scheduling Apps, Physician Reference Sites, and more
 - Offer current information and first-hand reviews of facilities where I have practiced
 - Coming... An interactive Blog for Traveler CRNA's to exchange information with each other in a secure environment
- Provide information about myself for Anesthesia Groups, Facilities, and Staffing Agencies
 - A summary of my experience, work ethics, and service priorities on the Home Page
 - Colleague Testimonials
 - Detailed credentialing information including:
 - Professional Licenses
 - Certifications
 - Current CV
 - Education and Diplomas
 - Liability Insurance
 - Case Logs
 - Peer and Professional References
 - Assignment History
 - Health Record information
 - Credentialed Facilities

Identification how the product positively influences nurse anesthesia or greater health care

Since the launch of Dreamsafe1099.com on October 4, 2018, I have received positive feedback from colleagues, staffing agencies, and facility credentialing offices on how valuable the information I have provided was for them. Staffing agencies and facility credentialing offices find that having access to my information significantly helps in streamlining the credentialing process. I feel that as more CRNA's discover this site, it will grow exponentially as a source for promoting the group of Traveler CRNA's that have been lacking organized advocacy for their skills and services. The potential for all CRNA's that visit the site to exchange their perspectives, acquired knowledge in health care and best practices, and support is unlimited in this early juncture.

Information demonstrating the individual's role or ownership of the intellectual property/devise/product
